Michael Okafor Tasie

Data Analyst | Python | Excel | Power BI
eme.okaformichael@email.com | 07831582408 | Luton, UK | linkedin.com/in/michael-tasie | github.com/gamathon340

PROFESSIONAL SUMMARY

Detail-oriented recent graduate with a strong foundation in Microsoft office and Python gained through academic projects and individual projects and collaborations. Proficient in translating raw datasets into clear, actionable insights using excel, python and power Bi. Seeking an entry-level Data Analyst role to apply analytical and problem-solving skills in a fast-paced, data-driven environment.

TECHNICAL SKILLS

- **Data Analysis**
  - Excel: PivotTables, VLOOKUP, formulas, charts
  - Python: data structures, file handling, data processing
  - Power BI: dashboards, data visualization
- **Tools**
  - Git/GitHub
  - Microsoft Word
  - Microsoft Teams
  - Figma

EDUCATION

Level 3 Diploma in Computing - Barnfield College, Luton | Sep 2024 – Jun 2026

Achieved D*DM

Relevant units: Systems Analysis & Design, Software Design and Development, Computer Networking, IT Systems Security, and Encryption.

Final project: Developed an application for children's entertainment using GDScript, with Excel used for development, management, and analysis of project data.

WORK EXPERIENCE

Warehouse Worker - Signature Flatbread, Dunstable | Jul 2025 - Present

- Prepared retailer orders and maintained basic stock records.
- Worked accurately to deadlines in a high-volume operational environment.
- Communicated with colleagues to resolve issues and coordinate order completion.

PROJECTS

Retail Sales Analysis Dashboard | Excel, Power BI

- Cleaned and analyzed retail sales data using Excel, identifying trends across products, regions, and monthly sales.
- Built an interactive Power BI dashboard displaying revenue, orders, sales trends and product performance.
- Presented findings through data visualizations and identified patterns in sales performance and discounting.

UK Data Analyst Job Market Analysis | Python, Pandas, Excel

- Cleaned and analyzed job-market data using Python and Pandas to investigate salary, location, and skill requirements.
- Used grouping, filtering, and aggregation to compare advertised salaries and demand across data-related roles.
- Created visualizations to communicate trends in salaries, locations, and commonly requested technical skills.

Customer Churn Analysis | Python, Pandas, Power BI

- Cleaned and analyzed customer data using Python and Pandas to identify factors associated with customer churn.
- Used data aggregation and visualization to compare churn across contract types, tenure, and payment methods.
- Developed a Power BI dashboard to communicate customer trends and support data-driven business analysis.

E-commerce Sales Database Analysis | SQL

- Designed a relational database containing customer, product, and order information.
- Used SQL queries, joins, aggregation, and filtering to analyze sales, customer behavior and product performance.
- Produced business-focused insights from transactional data and documented findings.

Sudoku – Personal Project, 2026

- Used dictionaries and sets to store and validate puzzle data.
- Built logic to identify duplicate values and check whether data already existed in a collection.
- Documented testing results, issues identified and next steps.

Find a word! — Personal Project, 2026

- Applied efficient iterative processes in python to search through user input to check if data is present
- Used python to create a file and sent the output of the program to the created file

Swamp City (A responsive Game) — Personal Project, 2026

- Used Figma for the design of the app and the site map
- Used Godot game engine to develop the created game
- Used Microsoft word for documentation of the project details issues and next steps
- Used Microsoft excel for creating a Gantt chart for proper documentation of time spent
- Used teams to communicate and collaborate with the stakeholders

Maths Quiz (A Mobile Game) — Personal Project, 2026

- Used Figma for the design of the app and the site map
- Used corona game engine to develop the created game
- Used Lua to write the scripts
- Used Microsoft excel for creating a Gantt chart for proper documentation of time spent
- Used teams to communicate and collaborate with the stakeholders

CERTIFICATIONS

- **Python Essentials 1** — Cisco Networking Academy (2026)
- Python Essentials 2 — Cisco Networking Academy (2026)
- **Data Analytics Essentials** — Cisco Networking Academy (2026)
